

PINT OF SCIENCE

13-15 MAY 2024

VENUE

THE BRITANNIA PUB
1 ALLEN STREET,
LONDON, W8 6UX

DOORS 18:30

EVENT 19:30-21:30

LIFE IN A PETRI DISH: FROM CELL TO ORGANISM

We're all made of millions of cells that replicate and regenerate on a daily basis, but how can we better understand how that all works? Scientists are able to look under the microscope and follow the journey of a single blob of cells to a living breathing organism - join us for an exciting evening learning about how this is all made possible by cutting edge technology!

HEARTFELT FUTURES: USING CARDIOLOGY AND GENETICS TO PREDICT FUTURE ILLNESS

What if we could anticipate exactly when and how we might get sick? Scientists are looking into our genetic code for clues to predict the chances of getting ill. This combined with new ways of modelling heart disease are transforming the future of healthcare!

DISEASES... IN A DISH

Where do diseases even come from? If you want to find out, join us for an exciting evening learning all about how scientists can take diseases out of the body and study exactly how they work, where they came from and how to detect them in humans.
